COMPUTER AND INTERNET FOR AFRICAN YOUTH

Y@M PUKRI

How can we help african youngsters be a part of the the global village ?

Why should new technology be of interest in africa ?

World wide data research, electronic mail(e-mail), electronic trade (e-commerce), long distance teaching and other things became possible and less expensive with the advent of the Internet.

The Internet is almost everywhere today.

It allows you to research and communicate efficiently no matter where you are.

African countries promoting development fund that NTICS are a good way to accelerate growth and the reduction of poverty.

NTICS are accessible to everywhere. This is why Yam Pukri works in Burkina Faso to train and advise the population on the use of NTICS and popularize it.

BURKINA FASO OVERVIEW MAP

YAM PUKRI is a national association. Members are professors, professionals in data processing, students and other institutions.

The objective of the association is to popularize the new technologies to youngsters.

Yam Pukri has an office of 12 people. The registered members are 700 people. Yam Pukri works all over the world with partners.

Its privileged partners are:

- **Terres des Hommes** in Switzerland (Geneva)
- **IICD , Holland** (<http://www.iicd.org>)
- La **Fondation de Devenir** in Switzerland (Geneva)
- many private partners.
- member of **ANAIS** (African Network for Advising in Information System)(<http://www.anais.org>)
- member of **Africanti** (<http://www.africanti.org>)
- Fragments du Monde** (<http://www.fragmentsdumonde.org>)

Yam Pukri also works with other institutions.

For example, we can mention:

- **REALISE** (Geneva) for the purchase of second computers hand
- the Superior school of data processing of Bobo Dioulasso Burkina

Yam Pukri also works with a lot of NGO's which cannot all be mentioned here. We help them to use the Internet, provide advice collect data in Internet sites etc.
